LED BARKIT-INTERNAL DRIVER (LBI) THE LINEAR TRANSFORMER

Usage & Applications

One solution. ETL listed as both a retrofit kit and a fixture.

Using the fast install magnetic brackets, light bars fit between any T5, T8 or T12 socketed fixture including

TROFFERS

Example 2x2 and 2x4 retrofitted with 3 light bars.

VAPOR TIGHT

WRAP

HIGH BAY

CONTINUOUS RUNS

UTILITY STRIP

COVE LIGHTING

RETROFIT MOUNTING KITS

Mount light bar to a Retrofit Mounting Kit for a faster, cleaner install.
- contact us for details.

ETL listed as a fixture under the following categories

STAIRWELL FIXTURE

LINEAR AMBIENT FIXTURE

HIGH BAY FIXTURE (LOW CEILING HEIGHTS)

HIGH BAY FIXTURE (HIGH CEILING HEIGHTS)

FIXTURE HOUSING KITS

Mount light bar to a Fixture Housing Kit for a faster, cleaner install.
- contact us for details.

LED BARKIT-INTERNAL DRIVER (LBI) THE LINEAR TRANSFORMER

INCLUDED WITH EVERY BAR

2X Surface Mount Magnetic Clips
(w/ easy bend and break lines)

4X 1/4" hex head-self drilling screws

1X Flex setting cover

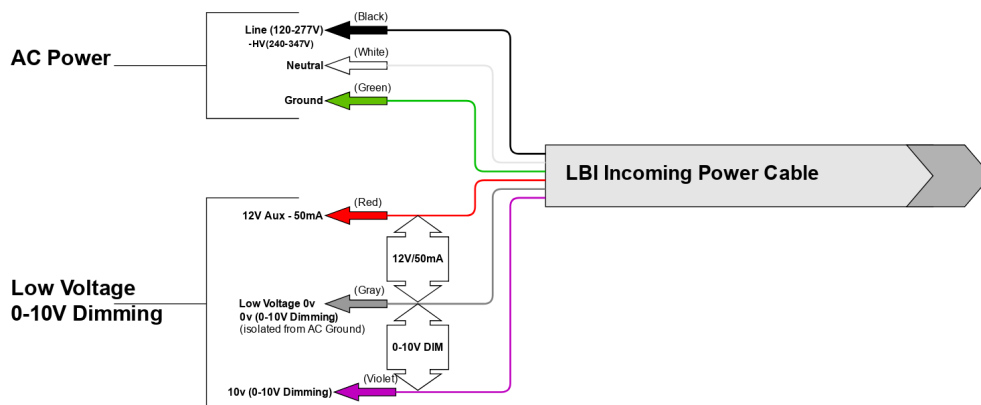

INCOMING POWER KIT: RP-LBI-G1-IP-3F-DIM – SOLD SEPARATELY

Kit Includes:

- 1 Incoming power cable (bar input side)
- 1 Service Disconnect
- 1 Abrasion protection grommet

WIRING DIAGRAM

—○ LEDBarKit-Internal Driver (LBI) Design Guide

A comprehensive guide to understanding, specifying, stocking, and selling the LEDBarKit-Internal Driver fluorescent replacement.

The Linear Transformer

With up to 146 lumens per watt, and up to 25 years of virtually maintenance free operation, learn why smart decision makers use the The Linear Transformer when upgrading to LED.

—○ Perfect replacement for

- Linear and general purpose
- Strips & Wraps
- Troffers
- Vapor Tights
- Low bay and High bay
- Coves and Soffits
- Stairwells

—○ LEDBarKit-Internal Driver (LBI)

FEATURES

The Linear Transformer is available in both BASE and PRO versions – choose which is best for you!

9 SKUs in 1 WITH FLEXWATT™
& FLEXCOLOR™ TECHNOLOGY

flex:WATT	2FT	6W	9W	12W
	3FT	10W	12W	15W
	4FT	10W	15W	25W

- Eliminate ordering and stocking multiple wattages and color temperatures. Product offers 9 SKUs in 1 unit which can easily be configured to 3 different wattage packages and 3 different CCTs.

- Product ships at a default color temp (K) and wattage setting (install as is, or tailor the settings to fit your needs).
- Save on labor costs by having us factory pre-set the wattage and color temperature.

FLEXCONTROL™ TECHNOLOGY

- Order control ready or basic control (integrated high/low and daylight sensor) or advanced controls (such as, Philips Easy Sense, Avi-On Bluetooth or Lutron Vive).
- Optional sensors are directly linkable to the light bars.
- Our basic motion/daylight control (OC2 ordering code) is adjustable via remote control for (1) sensitivity (2) duration of time at high light level before dimming to low (2) duration of time at low light level before turning off (3) ramping up and down light levels based on daylight and (4) the dimmed light level %.

SUITABLE FOR DRY & DAMP LOCATIONS

PASS-THROUGH 0-10V DIMMING & AUXILIARY 12V OUTPUT

- Allows all light bars to be dimmed together as a group.

ADAPTABLE MOUNTING

- Various mounting clip options with integrated rare-earth magnets for easy placement in all style fixtures.
- High Bay pendant chain options available.

CONNECT UP TO 40 LIGHT BARS ON ONE INCOMING POWER CABLE (CHECK LINKING CHART FOR VOLTAGE SPECIFIC LINKING QUANTITY)

Up to 146 LUMENS PER WATT EFFICACY

10 YEAR WARRANTY, L70 >100,000HRS

OPTIONAL EMERGENCY BATTERY BACKUP

OPTIONAL BAA SECTION 1605

(If you require BAA (ARRA Section 1605) add -AA at end of part number.)

SUITABLE FOR DRY & DAMP LOCATIONS

ADAPTABLE MOUNTING

- Various mounting clip options with integrated rare-earth magnets for easy placement in all style fixtures.
- High Bay pendant chain options for high bay installation.

CONNECT UP TO 40 LIGHT BARS ON ONE INCOMING POWER CABLE (CHECK LINKING CHART FOR VOLTAGE SPECIFIC LINKING QUANTITY)

139 LUMENS PER WATT EFFICACY

5 YEAR WARRANTY, L70 >50,000HRS

OPTIONAL EMERGENCY BATTERY BACKUP

OPTIONAL BAA SECTION 1605

(If you require BAA (ARRA Section 1605) add -AA at end of part number.)

LEDBarKit-Internal Driver (LBI)

FLEXWATT + FLEXCOLOR

2FT	6W	9W	12W
3FT	10W	12W	15W
4FT	10W	15W	25W

HOW IT WORKS

Our exclusive LED driver is designed to operate at 90%+ efficiency at each wattage setting. Our competitor's drivers have much lower efficiency (as low as 60%) which results in poor performance and reduced efficacy.

WATTAGE CHOICES

2FT	6W	9W	12W
3FT	10W	12W	15W
4FT	10W	15W	25W

WATTAGE SELECTION

Adjust the 3-position slide switch, no tools required.

- 2700°K WARM
- 3000°K WARM
- 3500°K NEUTRAL

- 3500°K NEUTRAL
- 4000°K NEUTRAL
- 5000°K COOL

HOW IT WORKS

We select the highest efficacy, multiple color LED diodes from quality suppliers, and mount them on the circuit board. A proprietary LED binning process ensures color consistency between fixtures. The FlexColor technology ensures the desired color is selected, every time.

COLOR CHOICES

	FLEXCOLOR SLIDE SWITCH POSITION		
	TOP	MIDDLE	BOTTOM
... -27K-WC2	2700K	3000K	3500K
... -40K-WC	3500K	4000K	5000K

COLOR SELECTION

Adjust the 3-position slide switch, no tools required.

LEDBarKit-Internal Driver (LBI)

PRODUCT SELECTION GUIDE (CONTINUED)

Default lumen package (wattage and CCT) are shown below in bold. There are two ways to achieve a non-default lumen package and/or CCT:
 1. You can easily adjust in field via our FlexWatt and FlexColor internal switches. 2. Have us adjust the FlexWatt and FlexColor at the factory for an additional charge.

3FT	40 BARS	40 BARS	40 BARS	40 BARS
2FT	40 BARS	40 BARS	40 BARS	40 BARS

LINKING POSSIBILITIES

- ▶ Linking cables will lower connectable quantities.
- ▶ The Linking numbers are based on using the LBI Junction box and connected end to end.
- ▶ Linking does not include 0-10V linked control. This will depend on the controlling device.

To order for continuous runs, please order "1 Bar Kits" + required accessory connectors (sold separately).
 Connect up to 40 light bars on one incoming power cable. (Check linking chart for voltage specific linking quantity)

IMPORTANT NOTE ON WIRING METHOD

As you will see on the following pages, there are many possible uses for The Linear Transformer. If your application calls for multiple light bars in a single fixture, there are 2 possible ways to order and wire (see below).

PARALLEL

Multiple incoming power cables can be grouped together under the ballast cover to make connection to incoming power and controls.

SERIES (WITH LINKING CABLE)

This method is the fastest. The first light bar uses an incoming power cable, additional light bars are linked using "linking cables" which are available in a variety of lengths. Linking cables are sold separately.

SERIES (WITH SEAMLESS CONNECTOR)

This method provides a near seamless appearance between the bars. The first light bar uses an incoming power cable, additional light bars are linked using "seamless connectors" which are sold separately.

RP-LBI-EMG1-25W (SINGLE FLEX)

RP-LBI-EMG2-25W (DUAL FLEX)

PRODUCT DESCRIPTION

The EMG-H Series LED emergency drivers are UL Listed for factory or field installation, unrivaled emergency solutions for LED product with internal driver. It allows the same LED luminaire to be used for normal and emergency operation and works in conjunction with an AC LED driver that convert new or existing LED fixtures into emergency lighting. It includes a long-life recyclable Lithium battery, and is backed by a 5-Year Warranty.

OPERATION

When AC power fails, The EM-H Series emergency LED driver immediately switches to the emergency mode, operating the LEDs at full lumen output for a minimum of 90 minutes (25W max load). When AC power is restored, the emergency driver automatically returns to the charging mode.

FEATURES

1. Long life recyclable Lithium battery.
2. Integration of test switch and charge indicator.
3. Used for exterior or interior of luminaire.
4. The power of LED luminaire < power of emergency driver.

MOUNTING CONFIGURATION:

RP-LBI-EMG1-25W Single Flex (Standard Version)

Mounts to the junction box and provides flexible conduit for remote mounting of the test accessories.

RP-LBI-EMG2-25W Dual Flex (Optional)

Provides dual flex for wiring to both fixture or driver compartment and test accessories

TYPICAL WIRING DIAGRAM

(Must connect DIM circuit from EM unit to LBI)

RP-LBI-EMG2-8W-DIM (LINKABLE UP TO 100W OF LBI)

RP-LBI-EMG2-25W-DIM (LINKABLE UP TO 300W OF LBI)

PRODUCT DESCRIPTION

The EMG-H Series LED emergency drivers are UL Listed for factory or field installation, unrivaled emergency solutions for LED product with Internal driver. It allows the same LED luminaire to be used for normal and emergency operation and works in conjunction with an AC LED driver that convert new or existing LED fixtures into emergency lighting. It includes a long-life recyclable Lithium battery, and is backed by a 5-Year Warranty.

INSTALLATION

The Emergency Back up will dim the connected fixtures down to a level where they will run without line voltage for 90Min. For fixtures that are connected to a wall dimmer the Emergency Back up will override the current dim setting and provide the maximum illumination possible at the selected wattage for 90Min.

How many fixtures can be connected? This is determined by the "maximum luminaire power load" listed for each respective back up wattage that we offer. The Luminaire power load is referencing the amount of power the fixture or fixtures consume. This is selected by the FLEX WATT setting of each fixture. When using multiple fixtures, the wattages are added together to get the total power load. For example, if the 4FT PRO LBI is being used, it has a maximum wattage setting of 25W, that means a maximum of 4 fixtures can be attached to the 8W emergency backup and a maximum of 12 fixtures can be used with the 25W back up version. For another example, if a single 4FT PRO LBI set at the highest wattage setting is attached to the 25W back up it will output full brightness for 90Min.

OPERATION

When AC power fails, The EM-H Series emergency LED driver immediately switches to the emergency mode for a minimum of 90 minutes. When AC power is restored, the emergency driver automatically returns to the charging mode.

FEATURES

1. Long life recyclable Lithium battery.
2. Integration of test switch and charge indicator.
3. Used for exterior or interior of luminaire.
4. 8W version, load up to 100W w/dim control 25W version, load up to 300W w/dim control

RP-LBI-SSC-NODIM-10P

NO-DIM

LINKING CABLES & SEAMLESS CONNECTORS

Use Linking Cables and Seamless Connectors to easily connect the power and control wires from one light bar to another. The ...-DIM version of the linking cables and seamless connector link all connections (AC power; 12V Aux power; 0-10V DIM signal) from light bar to light bar. Use these items to control all light bars from one sensor or incoming cable connection. The ...-NODIM version of these items only links the AC power. Use these items to AC power all light bars with a single power feed; but separate control signals into individual groups.

4.7IN SPACER CONNECTOR | RP-LBI-SRC-4.7IN (SINGLE PACK)

Use the 4.7in Spacer Connector to bring the length of the bar system to a standard dimension (24in, 36in, 48in). This is useful when retrofitting linear fixtures of a standard length. It allows for the bar to be centered on each standard-length fixture. Each 4.7in spacer connector comes with (2) Seamless Connector-DIM.

***Note: spacer does not emit light**

SENSOR KITS | RP-LBI-OC2-A (STANDARD RANGE - SINGLE PACK) RP-LBI-OC3-A_LR (LIMITED RANGE - SINGLE PACK)

Sensors kits for LBI are Tri-Level, remote controllable high frequency radar sensor designed to easily integrate with the LBI bars. It is totally plug&play! It can dim the light bars down to conserve more energy from both motion and daylight. The sensor controls the 0-10V DIM signal in both directions from the Sensor unit. Each sensor kit comes with (1) sensor (4.7 inch); (1) surface mount magnetic clip; (2) Seamless Connector-DIM; (1) 12" Linking Cable-DIM. See [RP-LBI-OC2-A/OC3-A](#) data sheet for more details.

SURFACE MOUNT MAGNETIC CLIP | RP-LBI-SMM-10P (10 PACK ONLY)

The Surface Mount Magnetic Clip provides the most universal method for attaching the light bar to a wall, ceiling, or fixture to be retrofitted. The mounting tabs that extend perpendicularly from the light bar can be easily removed by bending and breaking on the pre-scored line. The strong rare-earth magnets are intended to hold light bars in place while installing mechanical fasteners. Not intended for permanent installation with magnets only.

Two of these clips are included in each light bar kit.

SUSPENDED IN-LINE KIT | RP-LBI-SIL-KIT-10P (10 PACK ONLY)

The Suspended In-Line Kit includes everything needed to suspend LBI from the ceiling.

The complete kit includes: Suspended In-Line Bracket, Aircraft Cable (9.8ft), Adjustable cable gripper, and a ceiling anchor.

SUSPENDED IN-LINE BRACKET (*BRACKET ONLY*) | RP-LBI-SIL-BRACKET-10P (10 PACK ONLY)

The Suspended In-Line Bracket (bracket only) is a wide clip that fastens over the junction between 2 LBI light bars to keep them straight in-line and provides mounting points for common suspension methods (air craft cable, drop chain, etc.) This part number is for the bracket only.

—○ LEDBarKit-Internal Driver (LBI)

PARTS & ACCESSORIES

T-BAR CLIPS | **RP-LBI-T1516-10P (PARALLEL – DIRECTLY UNDER THE T-BAR – 10 PACK)**
RP-LBI-T1516-90-10P (PERPENDICULAR – ACROSS THE BAR – 10 PACK)

The T-Bar Clips is the fastest way to mount a light bar to a T-Bar grid ceiling. Works with standard 15/16" grid only.

BLADE CLIP | **RP-LBI-BLC-10P (10 PACK ONLY)**

The Blade Clip is designed to provide a retrofit solution for fixtures that have thin sheet metal or plastic film reflectors commonly found on high bay fixtures. The rotating mounting blade provides a degree of freedom to align the mounting holes on the blade with fastening locations that may not be in-line with the light bar or where the distance between available mounting points is greater than the length of the light bar. It is common to attach the blade to the same point holding the thin reflector to the fixture frame.

UP DOWN CLIP | **RP-LBI-UDC-10P (10 PACK ONLY)**

Use the Up/Down clip with our suspended in-line kit to clip a shorter bar to provide up-light. For example if suspending a 4ft, use the 3ft OR 2ft as the up-light, (so there is room for the suspension-kit connection). The RP-LBI-SIL-KIT comes with wire clips to hold linking power cable for UP bars in-line and neat. (linking cable not included)

LBI JUNCTION BOX | **RP-LBI-JBOX-1.5X4**

The LBI junction box is used to connect LBI wiring to branch circuits. Connections are made from the LBI Junction box to the Light Bar using seamless connector or linking cable. The internal wiring (except optional switch) are rated to 600V (for 347V operation) For undercabinet or task lighting, the junction box includes an optional 120V ON/OFF switch that can be installed into a rectangular knock-out on the cover. Kit includes 1pc RP-LBI-SSC-DIM.

12FT 90-DEGREE INCOMING POWER CABLE | **RP-LBI-G1-IP-90DEG-12F-DIM**

Use the 90 degree Incoming Power Cable for an easy and clean connection to suspended LBI fixtures.

OUTPUT CAP | **RP-LBI-G2-OUTPUT-CAP-10P**

Male power and control termination plug for the LBI linking connector 10 pack.

Sensor + Seamless Connector-DIM

UTILITY FIXTURE

To use as a standalone utility fixture, purchase 1X Light Bar kit and 1X incoming power cable kit.

Fixture housings to be used as wiring and emergency battery compartment currently in development. Call for more information.

RP-LBI-OC2 SENSOR KIT FOR LEDBARKIT - INTERNAL DRIVER (LBI)

Remote Control Settings

If satisfied with OC2 default settings, remote control is not needed. If settings need to be changed, optional remote control (RP-OC2-REMOTE-IR11), is required.

PERMANENT ON FUNCTION

Press 'ON' button, fixture goes to permanent on mode, sensor is disabled. With memory function against power failure.

* Press 'Auto' or 'Reset' to quit this mode.

PERMANENT OFF FUNCTION

Press 'OFF' button, fixture goes to permanent off mode, sensor is disabled.

* Press 'Auto' or 'Reset' learn' to quit this mode.

SENSOR MODE

Press 'Auto' button, the sensor starts to work and all settings remain the same as the latest status before the light was switched on/off.

RESET FUNCTION

Press 'Reset' button, all settings go back to factory default settings.

FACTORY DEFAULT SETTINGS - REMOTE REQUIRED TO CHANGE SETTINGS

- Sensitivity=50%
- Daylight sensor=disable
- Hold time=5min
- Twilight time=+∞
- Twilight level=30%

NOTE daylight harvest function is disabled in factory default mode. Choose the appropriate lux threshold first to activate the daylight harvest function.

DISABLE DAYLIGHT SENSOR

Press 'Disable' button, the daylight sensor will be disabled, the motion sensor will work always, even in daytime.

TEST MODE

'Test mode' is used for testing purpose only, for users to check the the desired detection range.

Quit test mode by pressing any other button of 'Hold time'. The sensor settings are changed accordingly.

TEST MODE SETTINGS

- Daylight sensor=disable
- Hold time=3s
- Twilight time=N/A
- Twilight level=N/A

IR11

- The buzzer short beeps (~0.5s) ONCE when sensor successfully receives RC signal after pressing any button.
- When "twilight level" set at 0%, it becomes ON/OFF control.
- The sensor controls the LBI fixtures w/ 0-10V inputs. Even if on/off only function is desired, the OC2 sensor is only compatible w/ PRO series LBI products. (Not compatible w/ LBI Base series)
