LED SIGN TUBES

Designed for speed. Built for signs.

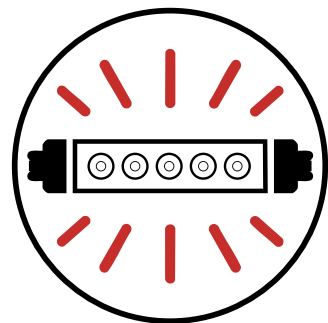

The simplest LED solution for sign cabinets. SignHero™ is designed to bypass the ballast **completely**—removing unnecessary components and dramatically reducing installation time. With no external driver or ballast required, you can mount, connect, and power up faster than ever.

Whether new construction or retrofit, you get Keystone reliability and longevity, making sure your message stands out for the long run. That's Light Made Easy®

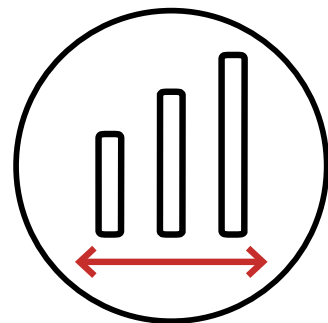

BYPASS THE BALLAST

Driver is built directly into the lamp via Direct Drive technology—eliminating the ballast and reducing installation time and components.

EVEN LIGHT DISTRIBUTION

For consistent illumination—Optical lenses cover each LED chip, eliminating hot spots.

LARGE VARIETY OF SIZES

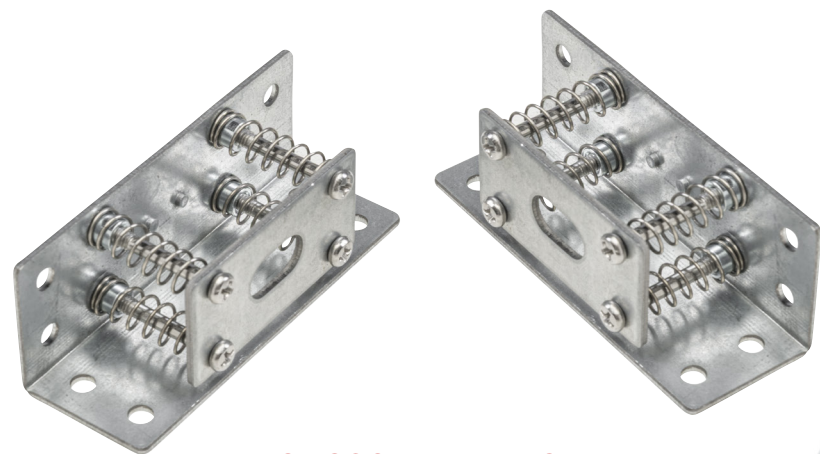

From 18 to 120 inches, the widest range of lengths in the industry.

New-Build Construction

Sign Hero Direct Wire

Sign Hero Direct Wire is ideal for new-build construction, allowing you to add lighting to your signs quickly and easily. Simply install our available spring-loaded brackets into the sign frame, bring in line voltage, and connect to the waterproof leader cord. No special expertise required.

EASY SOCKET-FREE SETUP

Install with available brackets for a perfect fit. No rewiring required

DIRECT WIRE

Allows for easy connection to line voltage

EVEN LIGHT DISTRIBUTION

Optical lenses cover each LED chip, eliminating hot spots

Change between 3 power outputs

4000K / 5000K / 6500K

ROTATABLE BASE

Allows you to direct light where it's most needed

INTEGRATED WATERPROOF CONNECTORS

Quickly link tubes in cabinet; protects lighting even if there are gaps or leaks in housing

360°
Sign Hero Direct Wire tubes are available in 360°

CONVENIENT FOR NEW BUILDS

For cabinets less than 36" deep, space tubes 12" apart and 6" from the face of the cabinet to ensure smooth, even light distribution. Power up to 150 feet on a single feed

SCAN QR CODE to Watch install video

Retrofit Construction

Traditional Sign Hero

Traditional Sign Hero is the ideal retrofit solution. With its ballast-bypass design, compatibility isn't a concern—a Keystone driver is integrated into the lamp and the lamp is directly wired to the power source. Together, these features help save money and reduce energy use. Installation and upgrades take just minutes.

ROTATABLE BASE
Allows you to direct light where it's most needed

EVEN LIGHT DISTRIBUTION
Optical lenses cover each LED chip, eliminating hot spots

COLOR SELECT
4000K / 5000K / 6500K

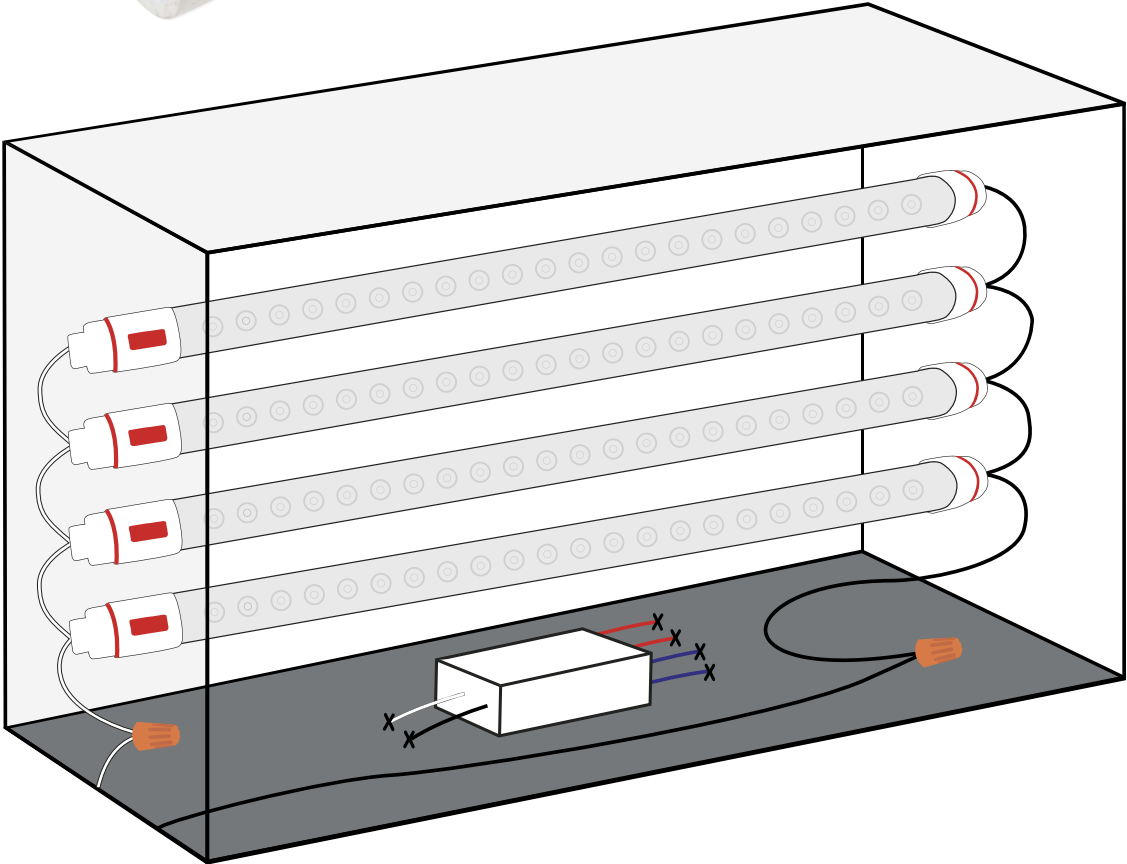

LARGE HEAT SINK
Provides optimal dissipation

180° OR **360°**

180° OR 360°
Traditional Sign Hero tubes are available in both 180° and 360° options

BALLAST BYPASS
Don't worry about compatibility. Keystone DirectDrive technology eliminates the need for an external driver or ballast while still using the existing sockets

Also available in Contractor Prime
Color Select • Full range of sizes • Light distribution suitable for color-faced signs
